What was the

The Problem...?

- Confusing request statuses
- Unclear adopter vs shelter roles
- Poor handling of multiple requests
- No clarity on next steps

Ambiguous Multi Step Process

Unclear Status & Roles

Emotional Decision Fatigue

Pawmigo connects potential adopters with pets

Pet adoption is emotional — confusing UX makes it worse.

Problem Solving in

Request Management

Reducing Friction for Pet Owners

Status Confusion

- Owners struggled to differentiate between approved and pending requests.
- **Solution:** Introduced **color-coded state containers.** Green = Approved, Neutral = Pending.

Benefit: Reduced cognitive load and improved decision speed

Action Overload

Problem: Multiple buttons created hesitation.

Solution: Primary action highlighted while secondary action is visually lighter.

Benefit: Encourages clear, confident decision-making

Visibility of Timeline

- Users didn't know when request was made.

Benefit: Improves trust and transparency.
